

Installation of Matlab & Toolboxes for Windows & Mac

As a prerequisite of installing Matlab you must first have Java Runtime Environment (JRE) installed on your computer.

Download from here: <http://java.com/en/download/index.jsp>

- Login via the email received direct from Mathworks
- Update (where appropriate) your Mathworks account and “Submit”
- *You are now directed to your account page*
- Click on the “Download Now” link (located under Account Services)
- Click on “Download”
- Click on “I Have JRE” *if prompted*
- Choose your preferred release and click “Download”
- *If prompted* Save and Run the application from your browser
- When prompted: choose “Login to the Mathworks Installer with your Mathworks Account” and click “Next”
- Accept the Licence Agreement and click “Next”
- Enter your email address and Mathworks Account Password
- Click “Next” when prompted to select the Licence
- Accept “Default Location” when asked to specify folder, click “Next” and, when prompted to “Install” click “Next”
- Choose “Programs Folder on the Start Menu” when prompted and click “Next” and “Install”
- Once Installation is complete click “Next” to activate & “Next” to finish installation
- Confirm Selection
- Finish
